Aerosol Generating Procedures

**Aerosol Generating Procedures (AGP)**

- Endotracheal intubation/extubation
- Care of intubated patient (in case of inadvertent disruption of circuit)
- Sputum induction
- Bronchoscopy
- Open airway suctioning
- High flow oxygen therapy
- Noninvasive ventilation
- Nebulizer treatment
- Cardiopulmonary resuscitation
- Manual ventilation

**Treat like Aerosol Generating Procedures**

- ENT/OMFS or other airway manipulating operative cases
- Tracheostomy care
- Endoscopy
- Transesophageal echocardiography
- Pulmonary Function Testing

*Adapted from the CDC Aerosol Generating Procedure list*  
** These procedures are not considered AGPs by the CDC, however, significant concern exists and as such, we recommend treating them like AGPs until further data are available
