COVID-19 Screening Questions

Are you a visitor or patient today? ___Visitor ____ Patient ____ other _______________________

Where are you going?  ___ clinic (what one?_______________________________________________)
                   ___ radiology, lab, blood draw or other testing
                   ___ being admitted/accompanying patient to be admitted (what unit?_____)

We are screening everyone and sharing some information.

Do you have any:

___ new or worsened cough
___ new or worsened shortness of breath
___ Fever
___ Body ache
___ Sore throat
___ Feeling like you are coming down with something.

If YES to any of the above, we will have you wear a mask. If you have a person with you, mask that person, too.

IF you have symptoms and are a visitor, you may not come into medical center. Go home and get well. If you need medical advice call your primary care doctor.

IF you have symptoms and are a patient, we will help decide if you are well enough for us to call the department, clinic or inpatient unit you are scheduled for. We will call and make sure they still want you to come. If they don’t, they will give us more information for you. If you are very sick – we will send you to the Emergency room. Approved support person for any patient with symptoms, must also mask and keep mask on for the duration of the visit. Visitor must stay in room with patient and not move around medical center.

If No, here is a sticker showing you don’t have symptoms of coronavirus. Please wear the whole time you are in medical center. Please leave immediately after your appointment, visit, etc.

We have stopped routine visitation during this Covid-19 crisis. Here is some additional information (provide handout). If you meet an exception on this information, please let me know. If you are going to an inpatient floor as the designated visitor, please go to front desk and get an identification badge. You will need your identification.
